

Property Registration Application – Hyperledger Fabric

Start & Configuration Instructions

- Run the following commands to bootstrap the network

Command to generate the crypto-materials:

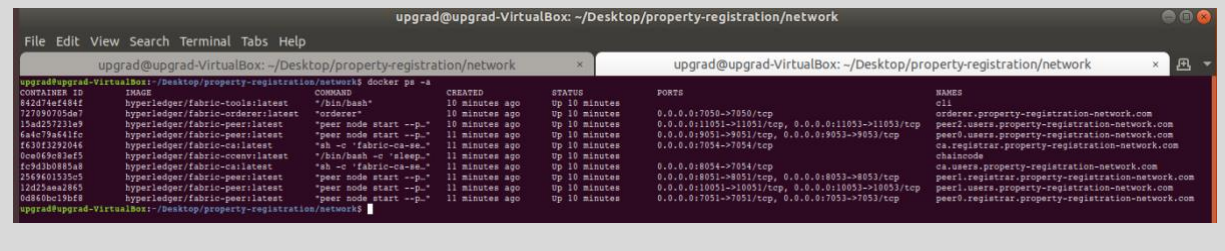

```
./fabricNetwork.sh generate
```

Command to start the network

```
./fabricNetwork.sh up
```

- Verify whether all the required containers are UP and running using following command

```
docker ps -a
```

CONTAINER ID	IMAGE	COMMAND	CREATED	STATUS	PORTS	NAMES
842d74ef484f	hyperledger/fabric-tools:latest	"/bin/bash"	10 minutes ago	Up 10 minutes		cli

0d860bc19bf8	hyperledger/fabric-peer:latest	"peer node start --p..."	11 minutes ago	Up 10 minutes	0.0.0.0:7051->7051/tcp, 0.0.0.0:7053->7053/tcp	peer0.registrar.property-registration-network.com

- Start the chaincode in DEV mode

SSH to chaincode container in new terminal/tab using the following command

```
docker exec -it chaincode /bin/bash
```

And then issue following command to start chaincode in DEV mode

```
npm run start-dev
```

```

```

With the above – We are SET to verify our functionalities.

Transactions

requestNewUser

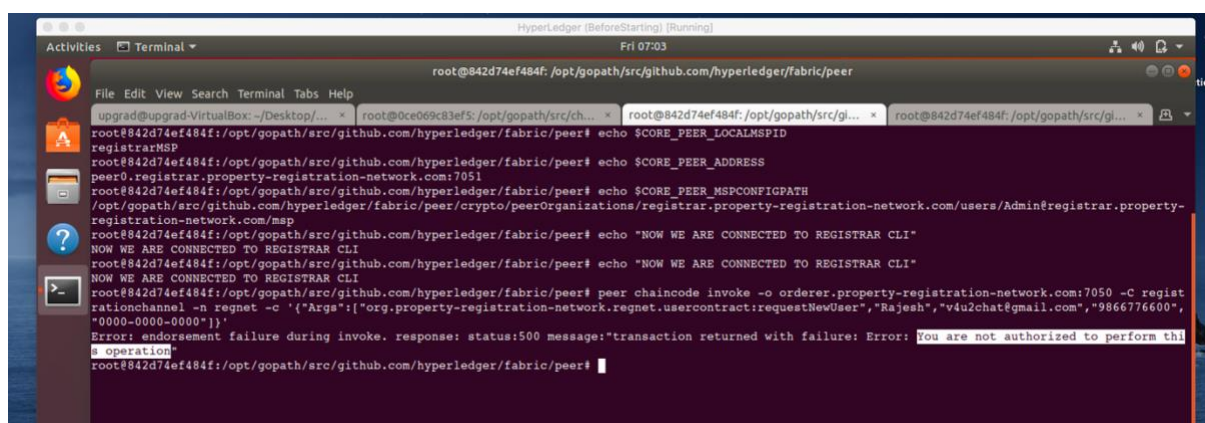

Execute the following command on **TAB 4: CLI – Connected to USERMSP**

```
peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:requestNewUser","Rajesh","v4u2chat@gmail.com","9866776600","0000-0000-0000"]}'
```

A terminal window showing the execution of a chaincode invoke command. The command is: `peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:requestNewUser","Rajesh","v4u2chat@gmail.com","9866776600","0000-0000-0000"]}'`. The output shows a successful response with status 200 and a payload containing user details: `{\"aadhaarNo\": \"0000-0000-0000\", \"name\": \"Rajesh\", \"email\": \"v4u2chat@gmail.com\", \"phoneNo\": \"9866776600\", \"state\": \"REQUESTED\", \"createdBy\": \"x509::C=US/ST=California/L=San Francisco/O=users.property-registration-network.com/CN=ca.users.property-registration-network.com\", \"createdAt\": \"2020-05-01T01:29:43.169Z\", \"updatedAt\": \"2020-05-01T01:29:43.169Z\"}`.

Validation Scenario: If we execute the above command from **TAB 3: CLI – Connected to REGISTRARMSP**, we will get Unauthorized message as shown below

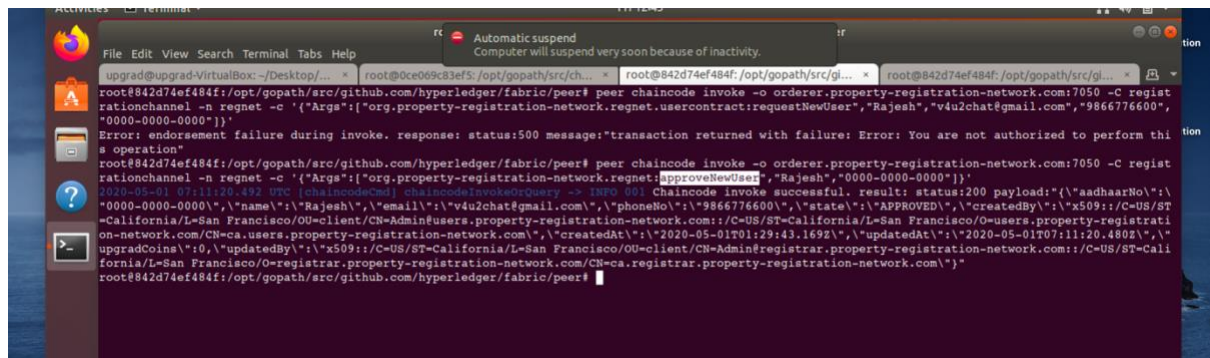

A terminal window showing the execution of the same chaincode invoke command as in the previous screenshot, but from the REGISTRARMSP context. The output shows an error: `Error: endorsement failure during invoke. response: status:500 message:\"transaction returned with failure: Error: You are not authorized to perform this operation\"`.

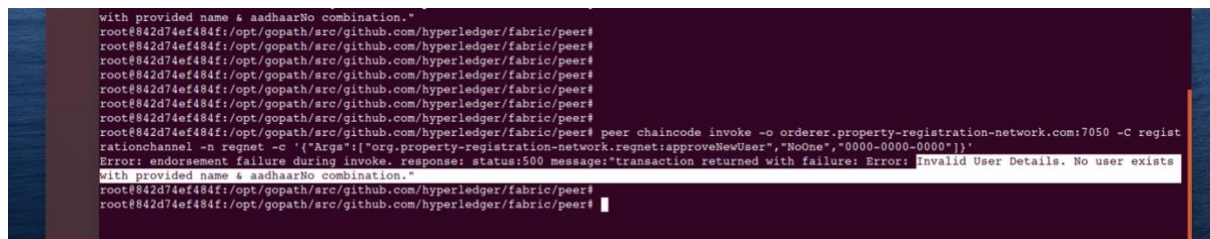

approveNewUser

TAB 3: CLI – Connected to REGISTRARMSP

```
peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet:approveNewUser","Rajesh","0000-0000-0000"]}'
```

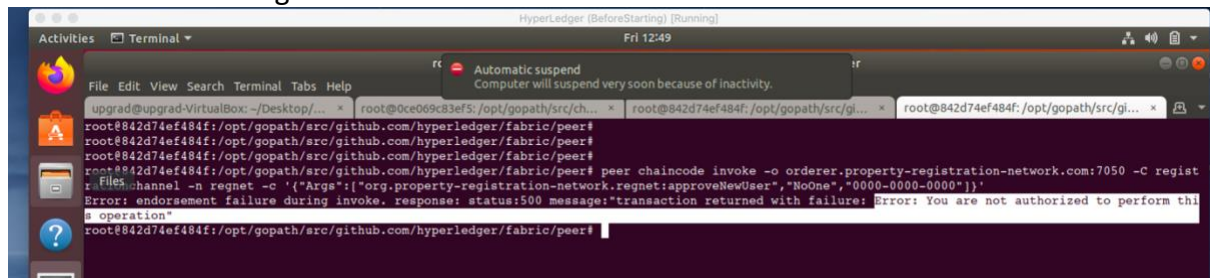

Validation Scenario#1: Invalid User Details

Validation Scenario#2: Invalid Initiator

If we execute the above command from TAB 4: CLI – Connected to USERMSP, we will get Unauthorized message as shown below

rechargeAccount

TAB 4: CLI – Connected to USERMSP

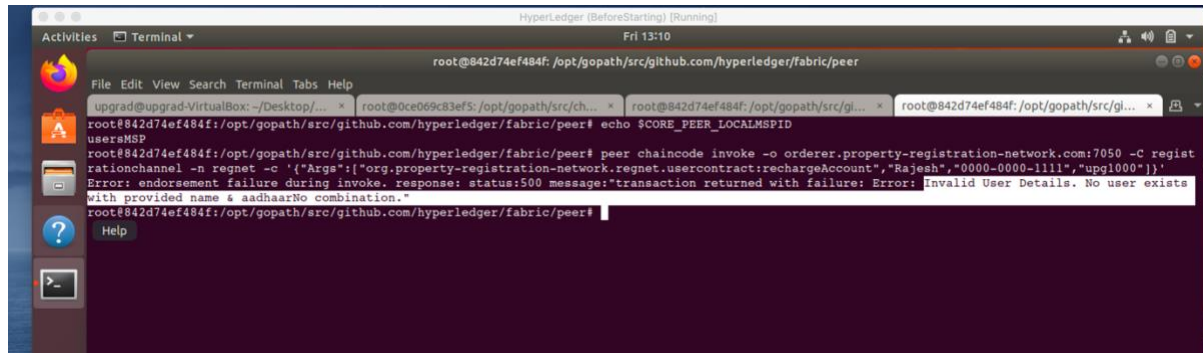

```

root@7fb8e26ec5e2: /opt/gopath/src/github.com/hyperledger/fabric/peer#
```

TAB 4: CLI – Connected to USERMSP

```
peer chaincode invoke -o orderer.property-registration-network.com:7050 -C
registrationchannel -n regnet -c '{"Args":["org.property-registration-
network.regnet.usercontract:viewProperty","1"]}'
```

The screenshot shows a terminal window with the command `peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:viewProperty","1"]}'` executed. The output indicates a successful transaction with status 200 and a detailed payload in JSON format.

Validation Scenario#1: Invalid Property ID

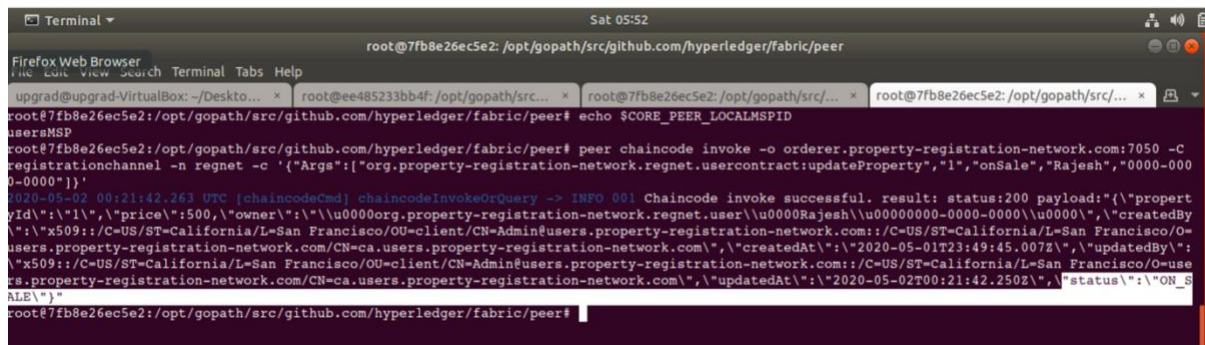

The screenshot shows the same command as before, but the output indicates a failure: `Error: endorsement failure during invoke. response: status:500 message:"transaction returned with failure: Error: Invalid Property Details. We already have a property registered with us for the given Property ID"`.

updateProperty

TAB 4: CLI – Connected to USERMSP

```
peer chaincode invoke -o orderer.property-registration-network.com:7050 -C
registrationchannel -n regnet -c '{"Args":["org.property-registration-
network.regnet.usercontract:updateProperty","1","onSale","Rajesh","0000-0000-
0000"]}'
```

The screenshot shows the command `peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:updateProperty","1","onSale","Rajesh","0000-0000-0000"]}'` executed. The output shows a successful transaction with status 200 and a detailed payload.

Validation Scenario#1: Invalid Property ID

The screenshot shows the same command as before, but the output indicates a failure: `Error: endorsement failure during invoke. response: status:500 message:"transaction returned with failure: Error: Invalid Property Details. We already have a property registered with us for the given Property ID"`.

Validation Scenario#2: Invalid Property Status

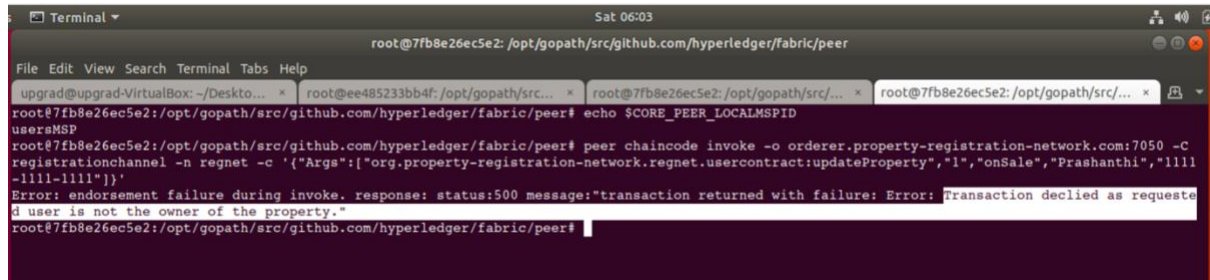

The screenshot shows the command `peer chaincode invoke -o orderer.property-registration-network.com:7050 -C registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:updateProperty","1","TEST","Rajesh","0000-0000-0000"]}'` executed. The output indicates a failure: `Error: endorsement failure during invoke. response: status:500 message:"transaction returned with failure: Error: Invalid Property Status : TEST."`

Validation Scenario#3: Invalid User Details

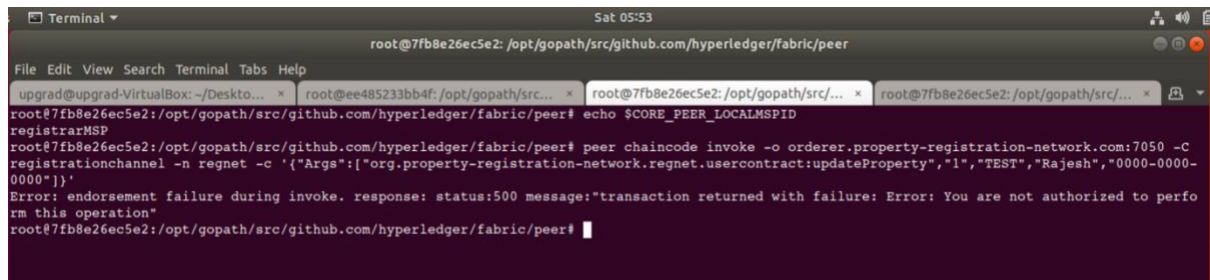

```
root@7fb8e26ec5e2:/opt/gopath/src/github.com/hyperledger/fabric/peer# peer chaincode invoke -o orderer.property-registration-network.com:7050 -c registrationchannel -n regnet -c '{"Args":["org.property-registration-network.regnet.usercontract:updateProperty","1","onSale","Rajesh","0000-0000-0001"]}'
Error: endorsement failure during invoke. response: status:500 message:"transaction returned with failure: Error: Invalid User Details. No user exists with provided name & aadhaarNo combination."
root@7fb8e26ec5e2:/opt/gopath/src/github.com/hyperledger/fabric/peer#
```

Validation Scenario#4: Update request by valid user. But, Not the owner of Property
